LawnFertiliser HOSE ON

Yates® BUFFALO PRO® lawn fertiliser is a premium liquid fertiliser, specially formulated to improve root growth and revive any stressed areas of Buffalo lawns.

- ▶ Fast acting nutrients provide a greener, thicker lawn in days
- ▶ High in potassium, to improve leaf strength in Buffalo lawns
- ▶ Contains seaweed and humates to promote root growth and improve soil health
- ▶ Contains essential nutrients that promote a thicker lawn to crowd out weeds

APPLICATION RATE	WHEN TO APPLY
Apply contents of this bottle over 150 m <sup>2</sup>	Spring to early Winter, applying every 4-8 weeks. Excellent during Summer to help cope with heat and stress damage

#### HOW TO PREPARE:

1. If needed, water the lawn and measure the area before application.
2. Shake the bottle well before applying.
3. Connect hose to hose-on applicator. You will need to have a click-on hose connector.
4. Ensure the applicator on/off switch is in the vertical OFF position, then lift plastic flap at front of applicator, ensuring it is completely open.
5. Turn on the garden tap using moderate to high water pressure.
6. Turn applicator on/off switch to horizontal ON position to commence spraying. Water mixes automatically with concentrate in the proper ratio.
7. Walk and spray lawn at a steady pace whilst sweeping the spray in a back and forth arc. Overlap treated areas slightly. Keep bottle upright; do not point at the ground.
8. When finished, return switch to the OFF position and turn off garden tap. Revert switch to the ON position to dispel any remaining pressure, before finally turning the switch to OFF. Remove from hose, close the flap and store product upright to prevent spillage.

#### GUARANTEED ANALYSIS

	% w/v
Nitrogen as urea	13
Nitrogen as nitrate	1
<b>Total Nitrogen (N)</b>	<b>14</b>
<b>Total Phosphorus (P) as water soluble*</b>	<b>2.5</b>
